

## National Conference on Ecosystem Restoration

*Building connections from the local to the landscape scale*

**August 26 - 30, 2018 | New Orleans, Louisiana, USA**

[www.conference.ifas.ufl.edu/ncer2018](http://www.conference.ifas.ufl.edu/ncer2018)

### Sunday, August 26, 2018

#### Conference Registration Opens and Poster Presenters and Sponsors Move-In Displays

[Acadia Ballroom - Level 3]

### Monday, August 27, 2018

#### Conference Registration Open

[Acadia Ballroom Foyer -Level 3]

#### Early Morning Refreshments in Poster & Sponsor Display Area

[Acadia Ballroom - Level 3]

#### Opening Plenary Session

[Mardi Gras Ballroom - Salons D & E - Level 3]

##### 8:30am Welcome & Introductions

**Matt Grabau**, Conference Co-Chair, US Fish & Wildlife Service, Tucson, AZ, and, President, Large Scale Ecosystem Restoration Section (LERS) of the Society for Ecological Restoration,

**Ryan Clark**, Conference Co-Chair, Research Scientist, The Water Institute, and Immediate Past President, Large Scale Ecosystem Restoration Section (LERS) of the Society for Ecological Restoration, Baton Rouge, LA

##### 8:45am Gulf of Mexico Plenary Session Introduction and Overview

**Nicholas G. Aumen**, Regional Science Advisor - South Florida, Center for Collaborative Research, US Geological Survey, Davie, FL

**Brittany M. Bernik**, Science Policy Fellow - NASEM Gulf Research Program, Gulf Coast Ecosystem Restoration Council, New Orleans, LA

#### Plenary Session: Gulf of Mexico - Defining Restoration Success from the Local to National Level

A series of four panels will focus on a different aspect or component of restoration in order to address the following question from multiple angles: Gulf Ecosystem Restoration - What Does Success Look Like? Panelists represent a diverse cross-section of disciplines including scientists, decision-makers, restoration planners, and funders, from the Gulf Region and across the nation. This series is designed to provoke new ideas by engaging audience participants and facilitating dialogue among panel experts, furthering our understanding of restoration challenges, lessons-learned, and future opportunities. In keeping with the broader conference theme, what successful ecosystem restoration looks like will be examined from the local to national level, with a focus on identifying, measuring, achieving and communicating restoration goals. These discussions will also explore how restoration in the Gulf is influenced by work done elsewhere and how lessons learned in the Gulf might apply to other regions.

#### Panel Session Agenda:

9:00am - 10:15am Panel 1: Restoration Planning for Success  
 10:15am - 10:45am REFRESHMENT BREAK  
 10:45am - 12noon Panel 2: How Do You Assess Cumulative Effects of Regional Restoration Efforts and Evaluate Success?  
 12noon - 1:30pm Lunch on Own  
 1:30pm - 2:45pm Panel 3: Integrating Restoration Science and Decision-Making  
 2:45pm - 3:15pm REFRESHMENT BREAK  
 3:15pm - 4:30pm Panel 4: The Future of Restoration  
 4:30pm - 5:00pm Keynote: **Susanne M. Torriente**, Assistant City Manager and Chief Resiliency Officer, City of Miami Beach, FL

Susanne Torriente will present the closing keynote address at the end of the Gulf of Mexico-themed plenary session - Gulf Ecosystem Restoration: What Does Success Look Like? As the Chief Resiliency Officer in a city tackling the challenges of sea level rise head on, Susanne will talk about the scale and complexity of scaling resilience planning and action at a city, county and regional level; as well as fully integrating resilience thinking into an organization's corporate culture and strategic budget process.

#### Welcome Networking Social

[Poster & Sponsor Display Area - Acadia Ballroom - Level 3]

<b>Tuesday, August 28, 2018</b>	
8:00am-5:30pm	<b>Conference Registration Open</b> [Acadia Ballroom Foyer - Level 3]
8:00am-9:00am	<b>Early Morning Refreshments in Poster &amp; Sponsor Display Area</b> [Acadia Ballroom - Level 3]
9:00am-10:00am	<p><b><u>Plenary Session</u></b>                  [Mardi Gras Ballroom - Salons D &amp; E - Level 3]</p> <p><b>Moderator: <i>Matthew C. Harwell</i></b>, Special Assistant to the Immediate Office, Gulf Ecology Division , National Health and Environmental Effects Research Laboratory, US EPA, Office of Research and Development , Gulf Breeze FL</p> <p><b><u>Presentation:</u></b>  <i>Barry Gold</i>, Environment Program Director, Walton Family Foundation</p> <p><b>Adaptive Management Planning and Implementation in Ecological Restoration: Opportunities &amp; Challenges</b>                  A changing climate is forcing individuals, communities, businesses and governments to adapt. More frequent and more severe storms, prolonged droughts, and rising seas are among the challenges we all must confront as a “new normal” where we are working. This new approach is certainly true for those of us involved in coastal restoration. Barry Gold will talk about how the Walton Family Foundation is adapting its strategies, approaches and measures of success in the face of a changing climate, and what this means for the larger issue of the restoration of coastal wetlands across the Gulf of Mexico.</p>
10:00am-10:30am	<b>Morning Break in Poster &amp; Sponsor Display Area</b> [Acadia Ballroom - Level 3]

<p>9:00am-10:00am</p>	<p style="text-align: center;"><b><u>Plenary Session</u></b> [Mardi Gras Ballroom - Salons D &amp; E - Level 3]</p> <p><b>Moderator: <i>Ryan Clark</i></b>, Conference Co-Chair, Research Scientist, The Water Institute, and Immediate Past President, and President, Large Scale Ecosystem Restoration Section (LERS) of the Society for Ecological Restoration, Baton Rouge, LA</p> <p style="text-align: center;"><b>Presentation:</b> <b><i>Mr. Garret Graves</i></b>, Congressman, Louisiana’s Sixth Congressional District, Baton Rouge, LA</p> <p>Congressman Garret Graves is a Republican Member of Congress representing Louisiana’s Sixth Congressional District. Graves previously served as Louisiana’s Chairman of the Coastal Protection and Restoration Authority (CPRA) where he managed one of America’s largest civil works programs in history. Under Graves’ tenure, Louisiana constructed more flood protection infrastructure and restored more miles of coastline than at any other period of time in the State’s history.</p> <p>An expert on multiple topics relevant to NCER 2018, Congressman Graves will share an update about his work in congress, his experience going from State to Federal Government, and his work on subcommittees and the funding he has secured for ecosystem restoration and disaster recovery. His experience with multiple coastal and riverine disasters (hurricanes, oil spill, river floods of 2016, etc.), gives him an insider’s view to how important the Mississippi River and its delta are to Louisiana and the nation as a whole. Rivers including the Mississippi, Amite/Comite and Bayou Lafourche, to name a few, can have multiple ecosystem benefits like flood risk reduction in the watersheds themselves, and at the coast where they deliver necessary freshwater, sediment, and nutrients to nourish coastal ecosystems, in addition to reducing nutrient overload to Louisiana’s coastal “Dead Zone”.</p>
<p>10:00am-10:30am</p>	<p><b>Morning Break in Poster &amp; Sponsor Display Area</b> [Acadia Ballroom - Level 3]</p>
