### Final Jeopardy

Instructions:
This lists the minimum PPE that applicators must wear.
What is “the label”?
These types of foot wear should not be worn while applying herbicides.
What are “leather or cloth”?
Loose fitting clothing offers more protection than tight fitting clothing for this reason:

Click mouse for correct response.
What is “it allows air to circulate”? 
In situations where you might be exposed to spray, mist or dust, this type of eye protection should be worn.
What are “tight fitting goggles”? 
The chemical resistance of materials to non-water based pesticides is most influenced by this.
What is “type of solvent used”?
This type of respirator supplies clean uncontaminated air from an independent source

Click mouse for correct response.
What is “an air-supplying respirator”?
Restricted-use pesticides are intended for use only by what group
What are “certified pesticide applicators”?
When it comes to heat stress, the factor an applicator has the most control over is this

Click mouse for correct response.
What is “how much water you drink””? 
When mixing and loading pesticides, doing this will help avoid exposure from splashing.
What is “working below face level”? 
In any situation where a pesticide has spilled, this should always be the very first thing you do.
What is “put on your PPE”?
This formulation is typically a poor choice for application to an area where bees forage.
What is “micro-encapsulated products”?
This individual has final responsibility for the safety of the applicator.

Click mouse for correct response.
What is “the license holder”? 
Acute effects of pesticide exposure occur within how many hours after exposure
What is “24 hours”? 
You should always wash your hands at these times.

Click mouse for correct response.
What are “before you eat; drink; use the bathroom; smoke”? 
This type of reaction occurs when an individual has reaction to a pesticide that others do not experience.
What is “allergic”? 
Human skin absorbs diluents of this type the best.
What is “oil-based”?
Double Jeopardy!
The parts of your body most likely to be exposed to pesticides.
What are hands and forearms’?”
If a pesticide handler’s eyes have been splashed with pesticide, the first appropriate first-aid measure would be this.

Click mouse for correct response.
What is “rinse the eyes with clean water”? 
These should be done if pesticides are spilled on the skin
What are “remove clothes; wash skin with soap and water”?
This area of the body exposed to pesticides tends to be the most absorptive.
What is “the genital area”?
This should be done if any pesticide is swallowed
What is “consult the pesticide label or MSDS”? 
Symptoms of pesticide exposure may be similar to symptoms of this
What is “heat stress”? 
Whenever someone is exposed to pesticides, this should always be consulted for recommended first aid and treatment.
What is “the label”?
These are symptoms of pesticide poisoning

Click mouse for correct response.
What are “headache, a sensation of tightness in the chest, dizziness, nausea or anxiety”?
This individual is responsible for the pesticide and the container from the moment it is sold.
What is “the licensed applicator”? 
Pesticides should never be transported in this part of a vehicle.
What is “in the passenger area”? 
These people should have access to locked pesticide storage facilities.
Who are “licensed applicators, or those working under their direct supervision”?
Double Jeopardy!
Pesticides should always be stored in this type of container.

*Click mouse for correct response.*
What is “original, with label that is readable”? 
Name four features that buildings used for pesticide storage should have.

Click mouse for correct response.
What are “good ventilation, dry, temperature control, humidity control, adequate lighting, locked”? 
This is the first response in handling a damaged pesticide container.
What is “placing the damaged container into a larger, intact container”?
The pesticide label is _____.

Click mouse for correct response.
What is “the law”? 
The signal word for the pesticides that are most toxic is this.
What is “danger”?
The active ingredient is the chemical in the product that does this.

Click mouse for correct response.
What is “control the target pest”? 
This is the name that the manufacturer gives to the product.
What is “the brand name”? 
The pesticide label contains information about these things regarding application – name at least two.
What are “rate, site, equipment?”
These are the 3 signal words found on the front-panel precautionary statements
What are DANGER; WARNING or CAUTION?
What... you never saw Jeopardy on TV?

Ok, click here to see the instructions
Game Instructions!

This game is based on the popular “Jeopardy” TV Game show.

Instructions:

• For small groups: divide participants into three groups. Each group acts as a team when answering questions. If a team answers a question correctly, the team is then handed the point card for that question. Answer all questions. At the end of the game, the teams each total their points. The team with the highest number of points wins, and each team member gets a prize.

• For large groups: someone picks the first category and value (example: Heat Stress for 20). The first person to raise her/his hand, or to stand up, has the opportunity to give an answer. If they answer correctly, they get a prize and choose the next question. If they are incorrect, move on to another person. Continue until all questions have been answered.
