Dr. Chris Worden co-founded Worden Farm in Punta Gorda, Florida with his wife, Dr. Eva Worden, in 2003. They grow certified organic vegetables, and distribute them locally, through their community supported agriculture (CSA) membership program and local farmers markets. Worden Farm’s community education program includes workshops, field trips and organic farming apprenticeships. The Wordens serve as agricultural consultants to help others to develop and improve their own organic, community-based farms. Last year, the Wordens received the Florida Innovative Farmer Award at this conference.
